## EDUCATION EXPERIENCE

---

### University of Macau

*Master of Philosophy (M.Phil.) of Microelectronics, GPA: 3.56/4.0*

Macau SAR, P.R.China

*Aug. 2022 – now*

### University of Electronic Science and Technology of China

*Bachelor of Optoelectronic Information Science and Engineering, GPA: 3.67/4.0*

Chengdu, Sichuan, P.R.China

*Sep. 2018 – June 2022*

## PUBLICATIONS

## PROJECT EXPERIENCE

---

### An 85-230VAC input and 3.3-4.6VDC output AC-DC converter

*Oct. 2023 - Oct. 2024*

- A Sigma-Floating-SC topology is proposed to achieve 81.3% peak efficiency and 1.52W maximum output power.
- Up to 10% increased efficiency over a large load current range, compared with prior works.
- The design is fabricated in a 180nmBCD process and the manuscript has been accepted by ISSCC 2025.

### Hidden

*Oct. 2023 - Oct. 2024*

- The manuscript has been submitted to CICC 2025.

### A fast-transient response single-input-multiple-output DC-DC converter

*Sep. 2022 - Oct. 2023*

- The design utilize an auxiliary capacitor stacked with the input power source to increase the inductor charging speed and thereby improve the transient response.
- Collaborated with 3Peak INCORPORATED.

### Low-power, high transient response LDO design without off-chip capacitors

*Nov. 2020 - Aug. 2021*

- Developed a bandgap with 1.2V voltage reference and 50nA current reference, whose power consumption was less than 200nW, in the temprature variation range of -40 to 125 degrees celsius.
- Developed a circuit of super positive feedback and self-bias amplifier, with static power consumption of 3-7uA and high bandwidth of 80M-160MHz.
- Won the first prize of National University Student Integrated Circuit Innovation and Entrepreneurship Competition in Southwest Devision (2021).

### Smartphone-based Analysis of Non-destructive Apple Brix Measurement

*Apr. 2021 - Aug. 2021*

- Designed an optical system using Zemax OpticStudio to achieve Czerny-Turner Spectroscope structure using a positive (converging) lens, two spherical mirrors, a blazed grating and a linear CCD.
- Designed a CCD driver board including a Xilinx FPGA, a Toshiba linear CCD, a high-speed and high-precision ADC and so on to capture light spectra and transmit digital spectra data to smart phones.
- Programmed verilog HDL codes on Xilinx FPGA to drive CCD and ADC, besides communicating with smart phones by USB protocol.
- Won the second prize of National University Student's Opt-Sci-Tech Competition (2021).

### Intelligent Biological Microscope

*Apr. 2020 - July. 2020*

- Designed a multi-method of resizing and merging limited images under microscope to make up a full cell image.
- Migrated M2Det algorithm to suit the blood cell recognizing, segmentation and counting.
- Developed a dataset of blood cells with five classification including neutrophils, lymphocytes, monocytes, eosinophils and basophils.

- Won the first prize of National University Student's Opt-Sci-Tech Competition (2020) and the first prize of China-U.S. Young Maker Competition in Chengdu Division (2020).

### **Intelligent Device to Protect Children left in Cars**

*Apr. 2019 - July. 2019*

- Designed a multi-model network merged by AgeNet and Yolo-v2 to detect children left in cars.
- Used sensors such as temperature and humidity sensor, Oxygen sensor and AIoT to send data to private servers.
- Programmed a mobile app to receive warnings sent by servers to remind children's guardians of the states in cars about their children.
- Won the third prize of National University Student's Opt-Sci-Tech Competition (2019).

## HONORS & AWARDS

---

- First Prize of National University Student Integrated Circuit Innovation and Entrepreneurship Competition in Southwest Division, 2021.
- Second Prize of National University Student's Opt-Sci-Tech Competition, 2021.
- First Prize of National University Student's Opt-Sci-Tech Competition, 2020.
- First Prize of China-U.S. Young Maker Competition in Chengdu Division, 2020.
- Third Prize of National University Student's Opt-Sci-Tech Competition, 2019.
- Third Prize of National Undergraduate Engineering Training Integration Ability Competition in Sichuan Province Division, 2019.

## WORK EXPERIENCE

---

### **Excellent President of Application Electronics Association**

*Sep. 2019 – Sep. 2021*

*Organized lectures and competitions about electronic design and program.*

### **Member of UESTC Linux User Group**

*July 2020 – July 2021*

## TECHNICAL SKILLS

---

**Circuit Design:** Printed Circuit Design, Integrated Circuit Design

**Programming Languages:** Verilog HDL, C for Embedded System, Python, Rust, High-Level Synthesis (HLS)

**Developer Tools:** Cadence (eg. Virtuoso, Capture CIS, Allegro), FPGA IDE (eg. Vivado, Diamond, Quartus), MDK-ARM, STM32CubeIDE, CCS
